Again using the crochet hook and A, work around the armholes with a sl st in every st, working an extra 20 ch sts to form a strap between back and front, then work back over the first row with a row of dc. Use the crochet hook and A to work around the back and front make as given for the armholes, forming the straps. Complete 7 bobbles, 6 flowers A, 2 flowers B, and 2 flowers C. Fabulous felted tote bag by Jennifer Hilton

Or

Cast off 8 sts, k10 sts, cast off 21 sts, k10 sts and slide onto a st holder (or knit onto a dpn and secure with end points or rubber bands). Cast off 11 sts, k10 onto a st holder as before, cast off 21 sts, k10 sts, cast off 2. You now have 60 live sts, with 2 x 10 sts on st holders, and 2 x 10 sts on your working needle. Using separate sources of yarn, (still working with one strand of A and one strand of B held together), work st st for 60 rows, holding RS of the straps together, and ensuring that there are no twists, use the 3 needle cast off to join each long strap to its end (sts held on st holder). This forms the two tote handles.

LARGE INNER POCKET

Using one strand of A, and one strand of yarn B held together, cast on 60 sts. Work 45 rows in stocking stitch, then cast off.

SMALL INNER POCKET

Using one strand of A, and one strand of B held together, cast on 10 sts. Work 18 rows in st st, then cast off.

TO FINISH OFF

Weave in all ends. Turn the bag inside out, and firmly sew in inner pocket, positioned as in the sketch, using yarns A and B. Use the sts to guide the line. Sew sides of pocket together to form a tube, then attach at side of the bag at the top. The pocket will sit a few cm below the top of the bag. Sew small pocket to the inside

of a wide side of the bag, sewing the sides and bottom firmly, leaving the top open.

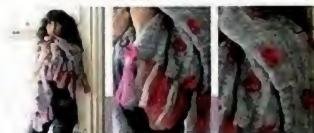

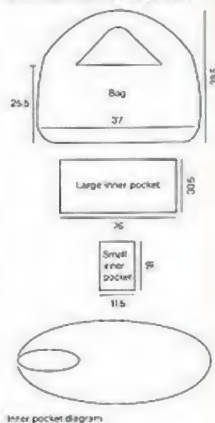

FULLING AND FORMING

The pictured bag was felted gently in a washing machine at 30 degrees on a cotton wash, using Ecolene Wash Balls to agitate. The bag was then stretched to shape, and washed again on a cold wool wash with wool detergent and conditioner. After washing the bag was stretched firmly into shape. The shapings at the bottom, the handles and the inner pockets all need to be stretched. Then the bag was lightly stuffed with crumpled newspaper to form it, the sides were steamed in the bottom seam folded up and the handles formed. Waste yarn was used to lightly tie the handles together to dry and to tie the pleats into position. The long edges were joined together with a safety pin. The shape of the bag needs to be formed carefully at this stage, so take time to achieve a finished shape you are happy with. The felt is very strong and will stand up to a lot of firm stretching.

FINISHING TOUCHES

Once dry, I sewed in the chunky zip to the inside pocket using the sewing needle and thread. The metallic clasps were positioned carefully where the safety pin had held the sides of the bag together. I used A and B to wrap over the outside rings of the magnetic clasps, before securely fixing them into place with pleats, and arranging the wool to cover the metal.

HOW TO DO NEEDLEFELTING SEE PAGE 48

TIPS

Needlefelting: Cheats's method
Make many felt balls at once by using a washing machine and some old nylon tights. Take a piece of fleece from the unspun wool 'top', which look like colourful cotton wool. Place a ball of the fleece into the toe of the tights, be opening with an elastic and repeat up the leg! Pop into a 60°C (140°F) wash with soap powder adding a pair of old pants to create friction.

1 Making a ball

Roll up a little fleece to form a core and start to wrap more fleece around it. The ball will shrink approx 50% or more, so wrap the ball substantially larger than you want it to end up. Add different coloured fibres to create depth

and pattern, and wrap a final wispy piece of fleece around it to keep everything in place.

2 Dampening

Spray the ball with soapy water until damp, but not drenched, or it may fall apart. Make your hands soapy, then roll the ball tightly between your palms, using as little pressure as possible. If it starts to resemble a small brain, release a little pressure. You don't want to squish it before it has started to harden sufficiently! After 5-10 minutes, you should notice the ball starting to feel harder and denser.

3 Rolling

Once the ball has hardened slightly, roll it gently on a bamboo mat or similar rough surface. As the ball hardens, increase the pressure until it comes together. Roll thoroughly in hot or boiling water, taking care not to scald yourself, and rinse out all the soap. Continue to roll on bamboo until the ball shrinks to desired size.

PUTTING TROUT MOBILE

1. Start with a large felting needle. For the orange fish, begin by making a basic oval shape for the body. Remember that fibres condense and mat together as you use needle felting, so the shape will shrink, just as in other forms of feltmaking. Spend some time on the body, constantly turning and refining the shape. Use several different shades of the same colour over the top of one another to add depth and shading.
2. Next, working directly onto dense foam, make a flat fish-tail shape with the same colour as the body. If it is required and attach this to the main body of the fish by

stationing with the needle.

For the tail and slightly

3. Now make the fins. Make two smaller fin shapes and one larger and longer one for the top fin. Try to shape with some small scissors if necessary. Pin the fins into position to get them looking correct before needle felting them onto the fish.
4. Using a fine needle, attach the pattern detail using the photographs to guide you. First cross-stitch the pale blue lines on the body, then wrap and attach black and white stripes at the top of the tail. Make pink stripes fan down the tail, then add the coloured spots. Finally add two eyes in blue with a small pink centre and outline in burgundy.
5. To make the lips for the fish use larger needles to make an oval shape in dark red fleece. Once you have the right shape attach it at the front of the fish by needling around the edges. When it is fixed start to push the needle in more along the centre line and indent the felt to form two lips. Keep stabbing until they are firmly in place and well outlined.
6. Repeat for the other two fish, using different colours and patterns - see photograph or just use your imagination!
7. With a needle and thread, stitch a piece of cord or ribbon to the top fin of each fish. Make each hanging cord a slightly different length so that the fish float at different heights. Attach the cords to convenient points on the driftwood or similar, then bring all three pieces to the centre above and tie off. Hang the mobile from a small hook fixed in the ceiling.

The quilt is made up of 49 squares each measuring 20 x 20cm (8 x 8in). Rowan cotton
